

Early Cease Charges for Consumer products (incl. VAT)
(Customers who contract or re-contract after July 4th 2023)

The early cease charge is calculated by multiplying the daily rate of service by the number of days remaining in the minimum term/contract term. For example if you have 30 days left in contract, the cease fees are Daily rate of service multiplied by 30.

The Daily rate of service is calculated as follows: Monthly rental (excluding any discounts) multiplied by the term of contract and divided by the number of days in contract term e.g. €65.99 x 12 months/365 days

Daily rate	Example of how it is calculated	Daily rate (€)
eir Broadband & off peak calls daily rate	Monthly rental (excluding discounts)* term of contract / number of days in contract term e.g. €65.99 x 12 months/365 days	€2.17
eir TV daily rate (basic package)	Monthly rental (excluding discounts) * term of contract) / number of days in contract term e.g. €19.99 x 12 months/365 days	€0.66
Mobile -30 day SIMO example	Monthly rental (excluding discounts) * term of contract) / number of days in contract term e.g. €29.99 x 1 month/30 days	€1.00
Mobile Billpay -24 month contract	Monthly rental (excluding discounts) * term of contract) / number of days in contract term e.g. €59.99 x 24 months/730 days	€1.97

Notes:

Minimum Contract term can be either 30 days, 12 months or 24 months

Days in 12 month contract term = 365 days

Days 24 month contract term = 730 days
